Climate Data Explorer (DEMO)

EXAMPLE ATTACHMENT - FICTIONAL DATA AND PROJECT

This one-page report is included only to demonstrate how a project attachment appears in the portfolio preview. It is not student work or a real assessment.

Sample monthly temperature data

MONTH	AVERAGE	OBSERVATIONS
January	31 F	31
February	35 F	28
March	46 F	31
April	58 F	30

Example learning outcomes

- Read rows from a small data file and calculate summary values.
- Compare monthly averages and present results in a simple table.
- Note: all dates, measurements, and project details here are fictional.
